Tina:

Why don't you come prepared to talk about it. Likely, going through an example will show how unusable the guidance is on the private side, given the lack of data and Widespread metrics. I noticed that even in the food industry example, that widespread was skipped. In other words, the guidance would probably not get us to a S&W determination on any industry, unless we have in depth data and deeply analyze each company (or at least the major ones). I could probably make the Widespread work--especially for private businesses.

Because Montana industry will not give us data, I think that this approach is probably out. But please come prepared to talk about it--I think it is important to go through it. Maybe we will find something there.

Thanks for all the work on this.

Jeff,

Attached is the template for the S&W impacts for the private sector. Thought you'd want to see these prior to the subcommittee meeting. Let me know if you have any questions. From your earlier email, I'm not sure whether these will be of interest to your group or not. But, at least you have them.

Tina
